Subject: RE: Question about aerial imagery

Hi,
The County owns the data, and we would consider the usage of it for open street maps an acceptable usage of the data.

Thank you,

Levi Roberts

Subject: Question about aerial imagery

Hi,

I am a volunteer of [OpenStreetMap](https://openstreetmap.org), a collaborative open project to create a global geodata set freely usable by anyone on share-alike and attribution terms under the [Open Database License \(ODbL\)](https://openstreetmap.org/help/en/faq/#odbl).

We're very interested in using your aerial imagery to improve the map. Contributors to OpenStreetMap will only be using this imagery to create trace features such as roads and buildings. In order to facilitate this, we want to confirm with you whether or not this imagery is considered to be in the public domain.

Thank you for your consideration. If you have any questions or would like more information about OpenStreetMap, please do not hesitate to contact me by e-mail.
